SafeData Publishes iSeries Rapid Recovery White Paper

Warwick, R.I. – March 17, 2009 – [SafeData, LLC](#), a technology company focused on helping companies protect their data, minimize downtime and recover and restore data quickly, today announced that it has published a new white paper titled [“Best Bets for iSeries Rapid Recovery with Virtualization: An Executive’s Guide to Affordable IBM iSeries Recovery in 12 Hours or Less”](#).

In this white paper, readers will gain a better understanding of the backup and recovery options available for the IBM iSeries platform and the value of virtualized recovery. The paper compares the benefits of virtualized recovery to traditional solutions for protecting the IBM iSeries and it discusses the cost differentiators as well as the risk and challenges of traditional methods.

“Protecting your data and applications hosted on your iSeries platform does not have to be expensive or a drain on your IT resources,” explained Peter Briggs, president of SafeData. “By outsourcing your virtualized recovery services to experts you will have an affordable backup and recovery solution that will keep your data safe, meet your aggressive recovery time objectives and will alleviate headaches for your IT team. In today’s market, you can’t afford downtime. Having a solution that enables your systems to be available in 12 hours or less will help you maintain your competitive edge.”

The white paper is available for download at: http://www.safedata.net/papers_reg_rapidiseries.asp.
